3 December 1954

MEMORANDUM FOR THE RECORD

25X1A6a
SUBJECT: Tour of [REDACTED] by the Task Force on
Intelligence Activities - 2 and 3 December 1954

25X1A6a

25X1X4 1. A very well planned and organized tour of [REDACTED] with the accompanying briefings appears to be one of the highlights of the investigation thus far. Both Colonel Lane and Colonel Miller seemed completely awestruck with the installation, its operation, vast facilities, and the caliber of instructor personnel. The outstanding demonstrations of [REDACTED] received high praise.

2. It was surprising that very few questions were asked by either of the Colonels other than questions concerning the physical aspects of the installation. At one point Colonel Lane asked the following two questions: (1) "How many students can you handle at [REDACTED]" 25X1X4 (2) "How many students do you have here at present?". A little later he informed me that the Study Group recommended that the training facilities be better utilized and that the Agency undoubtedly was implementing this recommendation.

3. Without a doubt a most favorable impression was created by this tour and the Training Staff is to be commended for an outstanding performance.
